

Multi-mode (WCDMA B5 / CDMA BC0 / HSPA+ / LTE) 3x3mm PA Module

Functional Block Diagram

Product Description

The TQM716015 is fully matched Power Amplifier Module designed for use in CDMA (BC0), WCDMA (Bands 5&6) and LTE handsets. Its compact 3x3mm package including a coupler and built-in voltage regulator makes it ideal for today's extremely small data enabled phones. Its RF performance meets the stringent linearity requirements for multi-mode operation.

The TQM716015 is designed on TriQuint's GaAs BiHEMT technology with CuFlip® assembly offering state of the art reliability, temperature stability and ruggedness. The 3-Gain state PA die operates in LPM, MPM and HPM to maximize talk time over the entire range of operating conditions. To simplify the cost/time of calibration while in production the TQM716015 can be used in 1-bit operation; either LPM/HPM with only 3.5mA of IcQ up to +13dBm in LPM, or MPM/HPM with 11mA of IcQ up to +17dBm in MPM.
